

NeuraLabel 300x ST

The 300x ST system provides superior print quality combined with the convenience of a roll system.

Simple, Yet Versatile

The NeuraLabel 300x ST (Straight Through) is an easy-to-use roll system that features a straight-through printing path, which makes this system ideal for short print runs, yet capable of large production runs as well.

Its strength is in its versatility. It can produce superior quality labels on many types and sizes of die-cut media. From papers to synthetics, a wide range of media is available from the industry's leading manufacturers to print the perfect labels for your products.

Engineered Quality and Performance

- The NeuraLabel 300x – ST is able to print at speeds up to 30 meter per minute utilizing the most advanced page-wide print head technology, similar to the technology found in high-end digital press operations.
- Variable width media handling makes the NeuraLabel 300x - ST ideal for labeling everything from pails to intermediate bulk containers.
- High yield cartridges combined with the additional tray decreases operational downtime and increases production turnaround.
- Incorporates 20 years of engineering expertise in scanning and printing continuous documents.
- Low printing cost combined with high speed makes it the perfect printer for GHS -industry.

Specifications

| | |
|------------------------|-------------------------------------|
| Media Width | 38mm - 215mm |
| Roll Diameter | Up to 279mm |
| Roll Unit Power Supply | External Auto-Switching, 100/240VAC |
| Media Speed | Up to 30 m/min. |
| Footprint | 149,8 cm W x 43cm H x 45,7cm D |
| Sensors | Dancer Arms |
