

LX610e Pro Colour Label Printer

Print and cut labels with the LX610e

Print and cut custom labels of any shape or size - all in one process.

Automatic Built-In Die-Cutting

With LX610e Pro printing and precise die-cutting are incorporated into one easy, time saving step. Just import your design into the included software and create an individual contour cut or select one of the many standard die-cuts (such as squares, circles, stars or rectangles). You will never need to order a custom die again!

Best Print Quality & Wide Variety of Substrates

LX610e Pro produces gorgeous, professional-quality labels with colour inkjet printing at up to 4800 dpi. With LX610e Pro you can choose from a wide variety of substrates, including White Gloss Polyester, Clear Gloss Polyester and White Gloss Paper. Additional materials are available if using pre-die cut stock.

Features

LX610e Pro combines colour label printing at up to 4800 dpi with a built-in digital die-cutting mechanism. The desktop-sized printer comes complete with intuitive, easy-to-use software for laying out print and cut files. Just like any other desktop colour label printer standard pre die-cut labels and tags can also be used with this device for just printing.

PTCreate™ Pro

With the included PTCreate Pro software you are ready for importing images and different file types as .psd, .ai and .pdf. Powerful features such as layering, the export of images and contour cutting around intricate artwork are part of PTCreate Pro. An auto-trace and cut function is especially useful for printing and cutting complicated shapes and designs.

Ink and Substrates

For LX610e Pro, two different types of ink and a wide variety of substrates are available. Dye-based ink prints bright and vibrant colours that are perfect for prime label applications. Pigment-based ink prints labels, that are slightly less bright but stand up to sunlight and water for years. They also more closely match the output you'd get from flexo inks. Substrates can include gloss and matte paper, polyester and polypropylene. ICC colour matching is also built-in and automatically loaded depending upon which ink and substrate is utilised.

LX610e Pro includes

- PTCreate Pro software for PC and Mac available
- One ultra-high yield CMY dye ink cartridge

LX600e Color Label Printer

If no cut to shape labels are needed, the sister product, the LX600e is the budget solution. It encompasses all the same quality features of the LX610e Pro without the built-in die-cutting.
